Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 November 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

The indicated allowability of claims 15-17 is withdrawn in view of the newly discovered reference(s) to Boyer U.S. Patent 2,869,507. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Boyer U.S. Patent 2,869,507.

Boyer disclosed an apparatus comprising at least one streamer (15); attachment means (16) having an aperture (17) which is capable of attaching the streamer to the finger or hand of a user; retention means (20) for retaining the streamer and the attachment means together as shown in Fig. 2. The retention means comprises a removable element in the form of open ends (22, 25) surrounding the streamer and attachment means.

Regarding the limitation “prior to use of said apparatus”, such limitation is not a positive structural limitation, no patentable weight has been given to such limitation.

Claim 17 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Boyer.

It is noted that Boyer failed to specifically disclose the band or element as resilient. However, the free ends (22, 25) must be able to resiliently open up for the

purpose of removing or inserting the streamers (15) when necessary; and this type of band or element is typically made from rubber, plastic, or light weight metal material and such materials are inherently resilient in nature. Accordingly, it would have been a matter of design choice to make the band (20) with any of the resilient material as listed.
